Hello Dennis,

I spoke with Steve Armann earlier today. It sounds like your risk assessor may have contacted Patrick Wilson, our risk assessor here in Region 9. Please let me or Steve know if you need any additional direction.

Thanks,  
Cynthia

Cynthia

If the DOT chooses to do the Risk Assessment for closure, can they commence backfilling of the excavation upon that decision point?

Dennis

Thanks for the update Dennis! We are interested in reviewing the analytical results from the MI sampling when you get it back from the lab. Please send to me when you get that data.

Thanks,  
Cynthia

Things went well. Had one deviation from plan on side walls as ground was too tight to hammer in sample probes to 2 feet depth so was only able to get to about a foot. Otherwise fine.

Hello Dennis,

I just wanted to check in with you to see how things went at the former PCB transformer site at the Kapalama base. How did the first day of the sampling effort go yesterday?  
Have a nice weekend!

Thanks,  
Cynthia
